

Workshop

Latin American Cooperation Network on the study of Late Blight and other diseases of the Solanaceae

Hotel Cabañas del Lago, Puerto Varas, Chile

Lunes, March 27, 2023

Invitation

You are cordially invited to the IV Workshop of the Tizon Latino Network. The objective is to share knowledge and experiences about late blight and other solanaceous diseases in Latin America, discuss joint research projects and promote actions that strengthen the Tizón Latino Network. In addition, today we want to expand the network to other potato pathologies of importance for Latin America.

This event will be held prior to the XXIX Congress of the Latin American Potato Association (ALAP) organized by the Chilean Potato Association ACHIPA (<http://achipa.cl>).

Place: Hotel Cabañas del Lago, Klenner 195, Puerto Varas, Región de Los Lagos, Chile.

Date: Monday, March 27, 2023, between 9:00 to 18:00 hrs.

Registration cost: US \$60 per person (include materials, lunch and coffee)

Sessions: oral and panel presentations. We invite you to share the latest technical advances related to potato health. If you are interested in participating with a presentation, contact Ivette Acuña at iacuna@inia.cl. Indicate in subject: Summary Tizon Latino.

The impact of climate change on the potato crop and other solanacea plant, as well as on their health status, makes it necessary to constantly study the populations of pathogens, their epidemiology and their interaction with the environment, to determine appropriate management strategies with a sustainable approach. In the specific case of potatoes, the socio-economic context of this crop in Latin America makes it necessary to seek to reduce the direct and indirect effects caused by late blight and other emerging diseases, which affect the food security of low-income farmers.

We look forward to seeing you in Puerto Varas,

Organizing Committee

PROGRAMME

Time	Activity	Chairperson
9:00- 9:30	Registration	Comité
9:30-9:45	Welcome Late blight network update	I. Acuña
9:45- 10:15	Conference Other pathologies of importance in Latin America	
10:15-11:00	Presentations P. infestans characterization	F. Lucca / S. Restrepo
11:00- 11.30	Coffe	
11.30- 12:15	Presentations Chemical control of late blight	J. Andrade- Piedra
12:15-13:00	Presentations Decision support systems	I.Acuña
13:00- 14.00	Lunch	
14:00 -15:45	Presentations Other pathologies of importance in the potato crop	W. Pérez
15:45- 16:15	Coffe	
16:15- 17:00	Prorization work and conclusions	Committee
17:00 - 18:00	Agreements and commitments	Committee
